SUMMARY

Front-End Developer (React, Next.js, TypeScript) with back-end integration experience. Bachelor of Artificial Intelligence student (expected 2027).

EXPERIENCE

- **Freelance Front-End Developer** | Al-Adl Organization (legal sector) **(Oct 2025 - Dec 2025)**

  Built the front end of a 7-page responsive website for a paying client, collaborating with a back-end developer who handled the server and hosting.

PROJECTS

- **Baskify | Full-Stack E-Commerce Platform** **(Aug 2026 - Oct 2026)**

  Built a full-stack store with Stripe Checkout, Supabase Auth (Google OAuth), Tailwind CSS, and a role-based admin dashboard for orders and products. Handled 3 concurrency failures (lost stock updates, duplicate webhook orders, last-item overselling) with an atomic PostgreSQL stock-decrement function, a unique constraint on `stripe_payment_intent_id`, and an automatic Stripe refund fallback. Fixed a mobile cart-loss bug by replacing email confirmation links with in-tab 6-digit OTP verification.

- **Beacon | Task and Analytics Dashboard** **(Jul 2026)**

  Developed a front-end dashboard with 7 route-level lazy-loaded pages, client-side route protection, persisted sessions and error boundaries with Suspense fallbacks. Designed 4 Zustand stores with atomic selectors to remove prop drilling and limit re-renders. Implemented 5 Recharts chart types, a WebGL globe, and a task table with filtering, search, sorting, and CRUD modals.

- **E-HSPTL | Medical Healthcare Platform** **(Oct 2025 - Dec 2025)**

  Built the front end of a MERN-stack healthcare platform in a team of 5 members, featuring location-based search of nearby facilities using Google Places API, doctor directories, and an admin dashboard. Contributed as a Frontend Developer using React.js and Tailwind CSS.

Training and Certifications

- **Front-End Development Trainee | Digital Egypt Pioneers Initiative (DEPI)** **(June 2025 - Dec 2025)**
  180-hour government-sponsored program covering React.js, Tailwind CSS, and UI/UX fundamentals; built E-HSPTL as the team capstone.

- **Front-End Development Trainee | National Telecommunication Institute (NTI)** **(July 2025)**
  120-hour bootcamp covering MEAN-Stack web development essentials.

EDUCATION

Bachelor of Artificial Intelligence, Kafr El Sheikh University **(Oct 2023 – Expected Graduation: 2027)**

Artificial Intelligence | Major: Bio-Artificial Intelligence Program

SKILLS

- **Programming:** JavaScript, TypeScript, HTML5, CSS3
- **Frameworks/Libraries:** React.js, Next.js, TailwindCSS, Shadcn/ui, Material UI, Bootstrap, Zustand, TanStack Query, Zod, React Hook Form, Supabase, Sass
- **Tools and Concepts:** Git, GitHub, Vite, SEO

Languages • Arabic (Native) • English (Professional Working Proficiency)
